Software Developer

PROFILE SUMMARY

Python Developer with 3 years of experience in building high-quality, scalable software applications using Django. Skilled in optimizing application performance and writing clean, maintainable code. Experienced with version control (GitHub) with basic exposure to AWS cloud. Demonstrates strong problem-solving skills and a commitment to collaborative, test-driven development. Additionally built personal projects like an Employee Performance Dashboard (React, Bootstrap, Django) to analyze employee metrics through interactive charts and role-based access. Available to join immediately.

EDUCATION

- 2023

MS/M.Sc(Science)
North Maharashtra University (NMU)
- 2021

B.Sc

WORK EXPERIENCE

- May 2022 - Present

Software Developer

Tata Consultancy Services (TCS)

- Built and maintained Python-Application developed in Django and deployed in AWS.
 - Developed optimized SQL queries and stored procedures in Snowflake to enable faster data retrieval and complex transformations.
 - Collaborated with business analysts to understand requirements and build data solutions supporting dashboards and reporting needs.
 - Participated in unit testing and QA to ensure robust and error-free data processing pipelines.

Projects

- 19 Months

Nielsen Media

- Purpose: To process and prepare large volumes of television audience measurement (TAM) data for client analysis.
 - Developed backend modules in Python for data ingestion, transformation, and validation.
 - Engineered and maintained REST APIs to deliver real-time audience metrics to clients.
 - Automated data workflows using Apache Airflow, scheduling batch jobs for report generation.
 - Worked on data extraction and transformation using SQL and AWS services like Lambda, S3, and EC2.
- 17 Months

IBM Maximo

- marathi
- hindi
- english

- Purpose: To automate and customize business rules within Maximo applications to improve operational efficiency.
- Developed and deployed Jython-based automation scripts to customize business rules in Maximo applications (e.g., Work Orders, PM, Assets).
- Created and managed Maximo Escalations to trigger actions, notifications, and report generation based on specific conditions.
- Built a dynamic Datasheet Report generation system using scripts, cron tasks, and Windows batch jobs to schedule and export reports to network locations.
- Designed Action Launch Points to execute scripts and business logic triggered by user actions or escalations.
- Performed configuration, testing, and deployment of automation solutions in development and production environments.

2 Months

Employee Performance Dashboard

- Developed a full-stack web dashboard to track and analyze employee performance metrics.
- Built a responsive UI with React and Bootstrap, and integrated interactive charts using Recharts.
- Implemented Django REST APIs for managing employee data, ratings, and reports.
- Added features like search, filter, and sorting to enhance usability for managers.
- Focused on secure data handling with authentication and role-based access.
